Berths No. 20 – 21 - Location

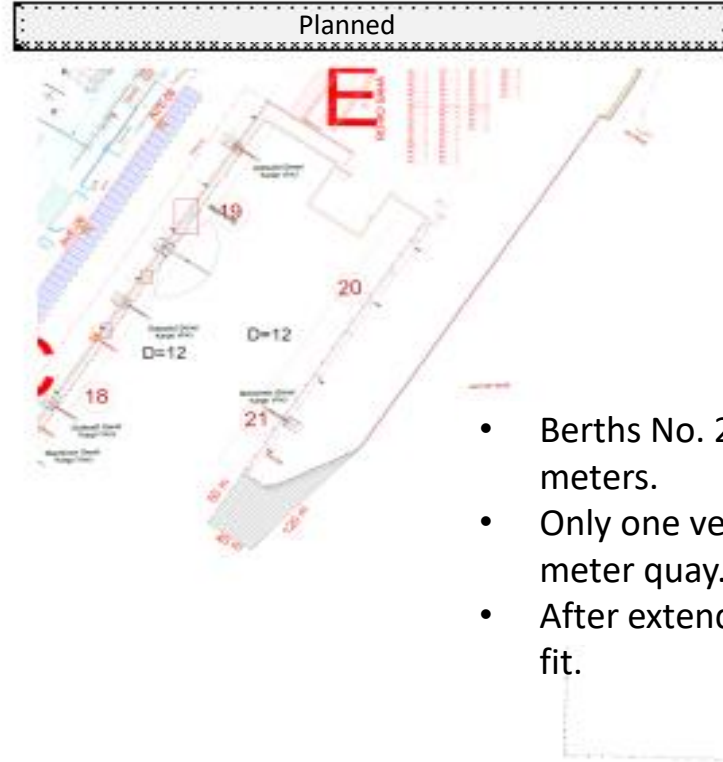

20 & 21 No'lu Rihtımın Uzatılması Projesi

Current Situation

Planned

- Berths No. 20&21 will be extended by 50 meters.
- Only one vessel can fit on the existing 255-meter quay.
- After extending 50 meters, 2 vessels will fit.

Final View of Berths 20 – 21

Due to the increase in vessel sizes, it was necessary to extend the berths 20-21 in order to provide safer service. Thus, it will be possible for the ships to be safely berthed and the service quality will increase. When the project is completed, only the west side of the extension will be used by MIP.

Mersin Port To Expand Routes To Be Redrawn
